

HIKMAH AI

AI in Education!

PROBLEM STATEMENT

Language Barrier

- How understanding Arabic texts is complex.

Relevancy Gap

- Classical knowledge isn't always connected to modern contexts.

Career Cliff

- Many students struggle to find practical applications or careers.

VISION & SUMMARY

To build an AI-powered intellectual companion for Dars-e-Nizami students that helps them:

1. Understand classical Arabic using multi-agent analysis (Sarf, Nahw, Balaghah, Lughat, and synthesis).
2. Bridge classical wisdom with modern contexts using dual-RAG (Retrieval-Augmented Generation) from classical and modern sources.
3. Find career pathways aligned with their scholarly expertise.

FIRST WORKFLOW

5-LENS SYSTEMS

- User inputs an Arabic sentence.
- AI agents analyze it using Sarf, Nahw, Balaghah, and Lughat.
- The system synthesizes a simple Urdu explanation.

ABOUT US

Enter Your Sentence...

SECOND WORKFLOW

DUAL-RAG SYSTEM

- User asks a conceptual question (e.g., “What’s Riba in modern banking?”)
- AI searches both Classical and Modern knowledge bases.
- It generates a unified answer bridging both worlds.

THIRD WORKFLOW

OPPORTUNITY EXPLORER

- The system scrapes opportunity and course data from trusted sources.
- AI converts both user profile and opportunity data into embeddings for smart matching.
- Shows real, ranked opportunities and skill paths.

Scrape → Chunk → Embed → Store → Query → Rank → Synthesize

PROJECT DEVELOPMENT APPROACH

- Set up all necessary environments for smooth collaboration.

Phase I — Foundation Setup Tasks

REPOSITORY & VERSION CONTROL

BASIC ARCHITECTURE SETUP

TEAM WORKFLOW

PROJECT DEVELOPMENT APPROACH

- Build the system that connects classical knowledge with modern academic data.

PHASE 2 — Dual-RAG “Relevancy Bridge” Deliverables

Functional Dual-RAG system

Two populated vector databases

UI for conceptual queries

PROJECT DEVELOPMENT APPROACH

- Enable Arabic sentence analysis using AI agents (Sarf, Nahw, Balaghah, Lughat, Insight).

Phase 3 — 5-Lens “Deconstructor” Deliverables

Working 5-Lens analysis system

Urdu synthesized explanation output

Tab with multi-section output

PROJECT DEVELOPMENT APPROACH

- Build the intelligent system that matches users with real-world opportunities.

Phase 4 — Opportunity Explorer Deliverables

Working manual opportunity recommender

Automated Scraping → Embedding → Matching pipeline

Interface for personalized career recommendations

PROJECT DEVELOPMENT APPROACH

- Connect all modules seamlessly, ensure reliability, and optimize user experience.

Phase 5 — Integration, QA, and Refinement Deliverables

Fully integrated Hikmah AI MVP

Verified outputs for 20 test cases

Polished user interface ready for deployment

Our development plan takes Hikmah AI from concept to a working ecosystem — one that helps students not only understand knowledge, but also connect and apply it in real life.

THANK YOU

Muhammad Abdullah
